O R D E R

At the informal conference held June 20, 1991 it was agreed by those present that Commission Staff would calculate a factor to be applied to AT&T Communications of the South Central States, Inc. ("AT&T") traffic data between Georgetown, Kentucky and Lexington, Kentucky filed in this proceeding. The information is intended to be used by local exchange carriers ("LECs") to produce an amount representing all interLATA carrier traffic between Georgetown and Lexington. In calculating the factor the Commission Staff utilized information filed by interLATA carriers on a regular basis which the Commission has already ordered to be protected from public disclosure pursuant to 807 KAR 5:001, Section 7.<sup>1</sup> Accordingly, the factor from which AT&T's interLATA market share for Kentucky may be derived should be held and retained by this Commission as confidential and should not be opened for public inspection.
